

PHENOSEEDER

Most accurate seed phenotyping in the world and high-precision seed placing

- Seed placing in trays, sorting racks, MTPs, on germination paper
- To combine with seed germination testing and plant phenotyping systems
- Developed by and distributed under license of Forschungszentrum Jülich, Germany

- High precision seed pick- and place-system
- 2D- and 3D- seed imaging
- Seed length, width, area, volume, color
- Seed weighing (μg to g range)
- For any type of seed, including light-weight seeds (Arabidopsis, tobacco)
- Proven for all standard crops—wheat, maize, rice, rapeseed, vegetables
